

PROGRAMS AT MILLS COLLEGE

CREATIVE WRITING MINOR

Creative writers articulate and defend the significance of creative expression, and effect change in their neighborhoods, communities, and industries. In this program, you'll learn to think independently, critically, and flexibly; write creatively and effectively; and approach problems productively. You'll have the opportunity to engage with peers in writing workshops and to experiment with artificial intelligence tools to bridge human creativity with the latest technologies. [Learn more here.](#)

SUSTAINABILITY STUDIES MINOR

This is an interdisciplinary program connecting social, economic, and environmental sustainability to the United Nations' global Sustainable Development Goals. You'll gain expertise in understanding complex global sustainability challenges, develop nimble problem-solving skills and a resilient mindset, and use artificial intelligence responsibly and effectively to propose and implement solutions. [Learn more here.](#)

RESEARCH ESSENTIALS BADGE

The Research Essentials badge helps undergraduates build the skills and confidence to get started in research opportunities. By earning this badge, you'll learn how research works, from peer review to reading academic texts, build research literacy and critical thinking skills, and discover how to find and join research opportunities across Northeastern's global experiential network. [Learn more here.](#)

CHAN-NORRIS SCHOLARS

The Chan-Norris Experiential Learning Program in Science and Sustainability gives students the opportunity to participate in guest lectures and field trips focused on natural sciences and sustainability. Delivering hands-on, co-curricular learning experiences, this program's impact on students extends well beyond the classroom. [Learn more here.](#)

PAULINE OLIVEROS WORKING RESIDENCY

The Pauline Oliveros Working Residency Program (POWR) is a research community comprised of our distinguished faculty in the arts and humanities, who hold endowed chairs. Each semester, POWR fellows present their works in progress to members of the campus community for dialogue and feedback. This program provides a platform to elevate the work and visibility of these scholars, while giving students the opportunity learn more about how research projects, publications, exhibitions, and articles are developed.
